# **Statement of Management Responsibilities**

Management is responsible for the following:

- Preparing and fairly presenting the accompanying separate financial statements of Republic Bank Limited ("the Bank"), which comprise the separate statement of financial position as at September 30, 2025, and the separate statement of income, separate statement of comprehensive income, separate statement of changes in equity and separate statement of cash flows for the year then ended, and notes to the separate financial statements including material accounting policy information;
- Ensuring that the Bank keeps proper accounting records;
- Selecting appropriate accounting policies and applying them in a consistent manner;
- Implementing, monitoring and evaluating the system of internal control that assures security of the Bank's assets, detection/prevention of fraud, and the achievement of Bank operational efficiencies;
- Ensuring that the system of internal control operated effectively during the reporting period;
- Producing reliable financial reporting that comply with laws and regulations, including the Companies Act; and
- Using reasonable and prudent judgement in the determination of estimates.

In preparing these audited separate financial statements, management utilised the IFRS Accounting Standards as issued by the International Accounting Standards Board and adopted by the Institute of Chartered Accountants of Trinidad and Tobago. Where IFRS Accounting Standards presented alternative accounting treatments, management chose those considered most appropriate in the circumstances.

Nothing has come to the attention of management to indicate that the Bank will not remain a going concern for the next twelve months from the reporting date; or up to the date the accompanying separate financial statements have been authorised for issue, if later.

Management affirms that it has carried out its responsibilities as outlined above.

Nigel M. Baptiste

President & Managing Director

November 5, 2025

Marsha McLeod-Marshall

# INDEPENDENT AUDITOR'S REPORT

# TO THE SHAREHOLDER OF REPUBLIC BANK LIMITED

# Report on the Audit of the Separate Financial Statements

## **Opinion**

We have audited the separate financial statements of Republic Bank Limited ("the Bank"), which comprise the separate statement of financial position as at September 30, 2025, and the separate statement of income, separate statement of comprehensive income, separate statement of changes in equity and separate statement of cash flows for the year then ended, and notes to the separate financial statements, including material accounting policy information.

In our opinion, the accompanying separate financial statements present fairly, in all material respects, the financial position of the Bank as at September 30, 2025, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards.

# **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Separate Financial Statements section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

# Responsibilities of Management and the Audit Committee for the Separate Financial Statements

Management is responsible for the preparation and fair presentation of the separate financial statements in accordance with IFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the separate financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Bank's financial reporting process.

### INDEPENDENT AUDITOR'S REPORT

# TO THE SHAREHOLDER OF REPUBLIC BANK LIMITED

## Report on the Audit of the Separate Financial Statements (continued)

# Auditor's Responsibilities for the Audit of the Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.

### INDEPENDENT AUDITOR'S REPORT

# TO THE SHAREHOLDER OF REPUBLIC BANK LIMITED

Report on the Audit of the Separate Financial Statements (continued)

Auditor's Responsibilities for the Audit of the Separate Financial Statements (continued)

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also: (continued)

• Evaluate the overall presentation, structure and content of the separate financial statements, including the disclosures, and whether the separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

EY

Port of Spain, TRINIDAD: November 5, 2025

# SEPARATE STATEMENT OF FINANCIAL POSITION AS AT SEPTEMBER 30, 2025

NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025 Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated

# 1. Corporate information

Republic Bank Limited (the 'Bank'), a wholly owned subsidiary of Republic Financial Holdings Limited (RFHL) is incorporated in the Republic of Trinidad and Tobago and was continued under the provision of the Companies Act, 1995. Its registered office is located at Republic House, 9-17 Park Street, Port of Spain. RFHL is the ultimate Parent of the Bank and is listed on the Trinidad and Tobago Stock Exchange.

The Bank has five subsidiaries and two associated companies. The Bank is engaged in a wide range of banking, financial and related activities in Trinidad and Tobago and Saint Lucia. A full listing of the Bank's subsidiary companies is detailed in Note 28, while the associate companies are listed in Note 6(a).

# 2. Material accounting policies

These separate financial statements provide information on the accounting estimates and judgements made by the Bank. These estimates and judgements are reviewed on an ongoing basis. Given the continued impact of global economic uncertainty exacerbated by high inflation, tariffs and rising interest rates, the Bank has maintained its estimation uncertainty in the preparation of these separate financial statements. The estimation uncertainty is associated with the extent and duration of the expected economic downturn in the economies in which the Bank operates. This includes forecasts for economic growth, unemployment, interest rates and inflation.

The Bank has formed estimates based on information that was available on September 30, 2025, which was deemed to be reasonable in forming these estimates. The actual economic conditions may be different from the estimates used and this may result in differences between the accounting estimates applied and the actual results of the Bank for future periods.

The principal accounting policies applied in the preparation of these separate financial statements are set out below. These policies have been consistently applied across the Bank.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025 Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

# 2. Material accounting policies (continued)

# 2.1 Basis of preparation

These financial statements are separate financial statements. Separate financial statements are those presented by a parent in which the investment in subsidiaries are accounted for on the basis of the direct equity interest and are stated at cost. A list of significant investments in subsidiaries is disclosed in Note 28 of these separate financial statements. The Bank has prepared its separate financial statements on the basis that it will continue to operate as a going concern. The separate financial statements of the Bank are prepared in accordance with IFRS Accounting Standards, and are stated in Trinidad and Tobago dollars. These separate financial statements have been prepared on a historical cost basis, except for investments in associates measured using the cost method, employee benefits measured as fair value of plan assets less the present value of defined benefit obligation and financial instruments measured at fair value through profit or loss. The preparation of separate financial statements in conformity with IFRS Accounting Standards, requires management to make estimates and assumptions. Actual results could differ from those estimates. Significant accounting judgements and estimates in applying the Bank's accounting policies have been described in Note 3.

## 2.2 Changes in accounting policies

The accounting policies adopted in the preparation of the separate financial statements are consistent with those followed in the preparation of the Bank's annual financial statements for the year ended September 30, 2024, except for the adoption of new standards and interpretations below.

Several amendments and interpretations apply for the first time in 2025. These are also described in more detail below. The Bank has not early adopted any standards, interpretations or amendments that have been issued but are not yet effective.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025 Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

# 2. Material accounting policies (continued)

# 2.2 Changes in accounting policies (continued)

IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 - Amendments to IAS 1 - Classification of Liabilities as Current or Non-current and Non-current Liabilities with Covenants (effective January 1, 2024)

The IASB issued amendments to paragraphs 69 to 76 of IAS 1 Presentation of Financial Statements to specify the requirements for classifying liabilities as current or non-current.

The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument, would the terms of a liability not impact its classification
- Disclosures

These amendments had no impact on the separate financial statements of the Bank.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025 Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 2. Material accounting policies (continued)

## 2.2 Changes in accounting policies (continued)

# IFRS 16 Leases - Amendments to IFRS 16 (effective January 1, 2024)

The amendment specifies the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains.

After the commencement date in a sale and leaseback transaction, the seller-lessee applies paragraphs 29 to 35 of IFRS 16 to the right-of-use asset arising from the leaseback and paragraphs 36 to 46 of IFRS 16 to the lease liability arising from the leaseback. In applying paragraphs 36 to 46, the seller-lessee determines 'lease payments' or 'revised lease payments' in such a way that the seller-lessee would not recognise any amount of the gain or loss that relates to the right of use retained by the seller-lessee. Applying these requirements does not prevent the seller-lessee from recognising, in the separate statement of income, any gain or loss relating to the partial or full termination of a lease, as required by IFRS 16.

The amendment does not prescribe specific measurement requirements for lease liabilities arising from a leaseback. The initial measurement of the lease liability arising from a leaseback may result in a seller-lessee determining 'lease payments' that are different from the general definition of lease payments in Appendix A of IFRS 16. The seller-lessee will need to develop and apply an accounting policy that results in information that is relevant and reliable in accordance with IAS 8.

A seller-lessee applies the amendment to annual reporting periods beginning on or after January 1, 2024. Earlier application is permitted and that fact must be disclosed.

A seller-lessee applies the amendment retrospectively in accordance with IAS 8 to sale and leaseback transactions entered into after the date of initial application (i.e., the amendment does not apply to sale and leaseback transactions entered into prior to the date of initial application). The date of initial application is the beginning of the annual reporting period in which an entity first applied IFRS 16.

These amendments had no impact on the separate financial statements of the Bank.

## 2. Material accounting policies (continued)

## 2.2 Changes in accounting policies (continued)

# IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures - Amendments to IAS 7 and IFRS 7 (effective January 1, 2024)

The amendments specify disclosure requirements to enhance the current requirements, which are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk.

#### Characteristics

The amendments clarify the characteristics of supplier finance arrangements. In these arrangements, one or more finance providers pay amounts an entity owes to its suppliers. The entity agrees to settle those amounts with the finance providers according to the terms and conditions of the arrangements, either at the same date or at a later date than that on which the finance providers pay the entity's suppliers.

### Disclosure requirements

The amendments require an entity to provide information about the impact of supplier finance arrangements on liabilities and cash flows, including terms and conditions of those arrangements, quantitative information on liabilities related to those arrangements as at the beginning and end of the reporting period and the type and effect of non-cash changes in the carrying amounts of those arrangements. The information on those arrangements is required to be aggregated unless the individual arrangements have dissimilar or unique terms and conditions. In the context of quantitative liquidity risk disclosures required by IFRS 7, supplier finance arrangements are included as an example of other factors that might be relevant to disclose.

These amendments had no impact on the separate financial statements of the Bank.

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 2. Material accounting policies (continued)

## 2.3 Standards in issue not yet effective

The following is a list of standards and interpretations that are not yet effective up to the date of issuance of the Bank's separate financial statements. These standards and interpretations will be applicable to the Bank at a future date and will be adopted when they become effective. The Bank is currently assessing the impact of adopting these standards and interpretations.

# IAS 21 The Effects of Changes in Foreign Exchange Rates - Amendments to IAS 21 (effective January 1, 2025)

The amendment to IAS 21 specifies how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking.

A currency is considered to be exchangeable into another currency when an entity is able to obtain the other currency within a time frame that allows for a normal administrative delay and through a market or exchange mechanism in which an exchange transaction would create enforceable rights and obligations.

If a currency is not exchangeable into another currency, an entity is required to estimate the spot exchange rate at the measurement date. An entity's objective in estimating the spot exchange rate is to reflect the rate at which an orderly exchange transaction would take place at the measurement date between market participants under prevailing economic conditions. The amendments note that an entity can use an observable exchange rate without adjustment or another estimation technique.

When an entity estimates a spot exchange rate because a currency is not exchangeable into another currency, it discloses information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.

## 2. Material accounting policies (continued)

# 2.3 Standards in issue not yet effective (continued)

# IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures - Amendments to IFRS 9 and IFRS 7 (effective January 1, 2026)

#### The amendments:

- Clarify that a financial liability is derecognised on the 'settlement date', i.e., when the related obligation is discharged, cancelled, expires or the liability otherwise qualifies for derecognition. It also introduces an accounting policy option to derecognise financial liabilities that are settled through an electronic payment system before settlement date if certain conditions are met
- Clarify how to assess the contractual cash flow characteristics of financial assets that include environmental, social and governance (ESG)-linked features and other similar contingent features
- Clarify the treatment of non-recourse assets and contractually linked instruments
- Require additional disclosures in IFRS 7 for financial assets and liabilities with contractual terms that reference a contingent event (including those that are ESGlinked), and equity instruments classified at fair value through other comprehensive income

The new requirements will be applied retrospectively with an adjustment to opening retained earnings. Prior periods are not required to be restated and can only be restated without using hindsight. An entity is required to disclose information about financial assets that change their measurement category due to the amendments.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

## 2. Material accounting policies (continued)

# 2.3 Standards in issue not yet effective (continued)

Contracts Referencing Nature-dependent Electricity – Amendments to IFRS 9 and IFRS 7 (effective January 1, 2026)

#### The amendments:

- Update the 'own-use' requirements for in-scope contracts. Under the amendments, the sale of unused nature-dependent electricity will be in accordance with an entity's expected purchase or usage requirements, if specified criteria are met
- Amend the designation requirements for a hedged item in a cash flow hedging relationship for in-scope contracts. The amendments will allow an entity to designate a variable nominal volume of forecast electricity transactions as a hedged item, if specified criteria are met
- Add new disclosure requirements to enable investors to understand the effect of these contracts on a company's financial performance and cash flows. IFRS 7 has been amended to require specific disclosures relating to contracts that have been excluded from the scope of IFRS 9 as a result of the amendments

The amendments only apply to contracts that reference nature-dependent electricity. These are contracts that expose an entity to variability in an underlying amount of electricity because the source of electricity generation depends on uncontrollable natural conditions, typically associated with renewable electricity sources such as sun and wind.

The amendments relating to the own-use exception must be applied retrospectively. An entity is not required to restate prior periods, and it is only permitted to do so if this can be done without using hindsight.

The hedge accounting amendments must be applied prospectively to new hedging relationships designated on or after the date of initial application.

The IFRS 7 disclosure amendments must be applied when the IFRS 9 amendments are applied. If an entity does not restate comparative information, then the entity must not present comparative disclosures.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 2. Material accounting policies (continued)

# 2.3 Standards in issue not yet effective (continued)

# IFRS 18 Presentation and Disclosure in Financial Statements (effective January 1, 2027)

IFRS 18 introduces new categories and subtotals in the statement of income. It also requires disclosure of management-defined performance measures (as defined) and includes new requirements for the location, aggregation and disaggregation of financial information.

# Statement of income

An entity will be required to classify all income and expenses within its statement of income into one of five categories: operating; investing; financing; income taxes; and discontinued operations. In addition, IFRS 18 requires an entity to present subtotals and totals for 'operating profit or loss', 'profit or loss before financing and income taxes' and 'profit or loss'.

#### Main business activities

For the purposes of classifying its income and expenses into the categories required by IFRS 18, an entity will need to assess whether it has a 'main business activity' of investing in assets or providing financing to customers, as specific classification requirements will apply to such entities. Determining whether an entity has such a specified main business activity is a matter of fact and circumstances which requires judgement. An entity may have more than one main business activity.

# Management-defined performance measures

IFRS 18 introduces the concept of a management-defined performance measure (MPM) which it defines as a subtotal of income and expenses that an entity uses in public communications outside financial statements, to communicate management's view of an aspect of the financial performance of the entity as a whole to users. IFRS 18 requires disclosure of information about all of an entity's MPMs within a single note to the financial statements and requires several disclosures to be made about each MPM, including how the measure is calculated and a reconciliation to the most comparable subtotal specified by IFRS 18 or another IFRS Accounting Standard.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 2. Material accounting policies (continued)

## 2.3 Standards in issue not yet effective (continued)

# IFRS 18 Presentation and Disclosure in Financial Statements (effective January 1, 2027) (continued)

Location of information, aggregation and disaggregation

IFRS 18 differentiates between 'presenting' information in the primary financial statements and 'disclosing' it in the notes, and introduces a principle for determining the location of information based on identified 'roles' of the primary financial statements and the notes. IFRS 18 requires aggregation and disaggregation of information to be performed with reference to similar and dissimilar characteristics. Guidance is also provided for determining meaningful descriptions, or labels, for items that are aggregated in the financial statements.

Consequential amendments to other accounting standards

Narrow-scope amendments have been made to IAS 7 Statement of Cash Flows, which include changing the starting point for determining cash flows from operations under the indirect method from 'profit or loss' to 'operating profit or loss'. The optionality around classification of cash flows from dividends and interest in the statement of cash flows has also largely been removed.

IAS 33 Earnings per Share is amended to include additional requirements that permit entities to disclose additional amounts per share, only if the numerator used in the calculation meets specified criteria. The numerator must be:

- An amount attributable to ordinary equity holders of the parent entity; and
- A total or subtotal identified by IFRS 18 or an MPM as defined by IFRS 18.

Some requirements previously included within IAS 1 Presentation of Financial Statements have been moved to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors, which has been renamed IAS 8 Basis of Preparation of Financial Statements. IAS 34 Interim Financial Reporting has been amended to require disclosure of MPMs.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 2. Material accounting policies (continued)

# 2.3 Standards in issue not yet effective (continued)

# IFRS 19 Subsidiaries without Public Accountability: Disclosures (effective January 1, 2027)

IFRS 19 Subsidiaries without Public Accountability: Disclosures, allows eligible entities to elect to apply reduced disclosure requirements while still applying the recognition, measurement and presentation requirements in other IFRS Accounting Standards. Unless otherwise specified, eligible entities that elect to apply IFRS 19 will not need to apply the disclosure requirements in other IFRS Accounting Standards.

An entity applying IFRS 19 is required to disclose that fact as part of its general IFRS Accounting Standards compliance statement. IFRS 19 requires an entity whose financial statements comply with IFRS Accounting Standards including IFRS 19 to make an explicit and unreserved statement of such compliance.

### Eligible entities

An entity may elect to apply IFRS 19 if at the end of the reporting period:

- It is a subsidiary as defined in IFRS 10 Consolidated Financial Statements;
- It does not have public accountability; and
- It has a parent (either ultimate or intermediate) that prepares consolidated financial statements, available for public use, which comply with IFRS Accounting Standards.

### Public accountability

An entity has public accountability if:

- Its debt or equity instruments are traded in a public market, or it is in the process of issuing such instruments for trading in a public market; or
- It holds assets in a fiduciary capacity for a broad group of outsiders as one of its primary businesses (i.e., not for reasons incidental to its primary business).

# 2. Material accounting policies (continued)

# 2.4 Improvements to IFRS Accounting Standards

The annual improvements process of the International Accounting Standards Board deals with non-urgent but necessary clarifications and amendments to IFRS. The following amendments are applicable to annual periods beginning on or after January 1, 2026.

<b>IFRS</b>	Subject of Amendment
IFRS 1	First-time Adoption of International Financial Reporting Standards – Hedge accounting by a first-time adopter
IFRS 7	Financial Instruments: Disclosures – Gain or loss on derecognition
IFRS 7	Financial Instruments: Disclosures – Disclosure of deferred difference between
	fair value and transaction price
IFRS 7	Financial Instruments: Disclosures – Introduction and credit risk disclosures
IFRS 9	Financial Instruments – Lessee derecognition of lease liabilities
IFRS 9	Financial Instruments – Transaction price
IFRS 10	Consolidated Financial Statements – Determination of a 'de facto agent'
IAS 7	Statement of Cash Flows – Cost method

NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025 Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 2. Material accounting policies (continued)

# 2.5 Summary of material accounting policies

#### a) Cash and cash equivalents

For the purpose of presentation in the separate statement of cash flows, cash and cash equivalents consist of highly liquid investments, cash on hand, due from banks, Treasury Bills and bankers' acceptances with original maturities of three months or less. Bankers' acceptances and due from banks with maturities greater than three months are classified as investments.

# b) Statutory deposits with Central Bank

Deposits with the Central Bank of Trinidad and Tobago and other regulatory authorities represent the Bank's regulatory requirement to maintain a percentage of deposit liabilities as cash, Treasury Bills and/or deposits with Central Bank. These funds are not available to finance the Bank's day-to-day operations. Other than statutory deposits of \$3.3 billion (2024: \$3.3 billion), the Bank holds Treasury Bills and other deposits of \$0.4 billion (2024: \$0.5 billion) with the Central Bank of Trinidad and Tobago and \$0.5 billion (2024: \$0.2 billion) in foreign Treasury Bills as at September 30, 2025. Interest earned on these balances for the year was \$31 million (2024: \$31 million).

# c) Financial instruments - initial recognition

# i) Date of recognition

Financial assets and liabilities, with the exception of loans and advances to customers and balances due to customers, are initially recognised on the trade date, i.e. the date that the Bank becomes a party to the contractual provisions of the instrument. This includes regular way trades: purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Loans and advances to customers are recognised when funds are transferred to the customers' accounts. The Bank recognises balances due to customers when funds are transferred to the Bank.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

# 2. Material accounting policies (continued)

# 2.5 Summary of material accounting policies (continued)

# c) Financial instruments - initial recognition (continued)

### ii) Initial measurement of financial instruments

The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments, as described in Note 2.5 (d) (i). Financial instruments are initially measured at their fair value, except in the case of financial assets recorded at fair value through profit or loss (FVPL), transaction costs are added to, or subtracted from, this amount.

## iii) Measurement categories of financial assets and liabilities

The Bank classifies all of its financial assets based on the business model for managing the assets and the assets' contractual terms, measured at either:

- Amortised cost, as explained in Note 2.5 (d) (i)
- FVPL, as explained in Note 2.5 (d) (ii)

Financial liabilities, other than loan commitments and financial guarantees are measured at amortised cost.

### d) Financial assets and liabilities

# i) Other assets, Due from banks, Treasury Bills, Advances and Investment securities

The Bank only measures Other assets, Due from banks, Treasury Bills, Advances to customers and Investment securities at amortised cost if both of the following conditions are met:

- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding and
- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

# 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

- d) Financial assets and liabilities (continued)
  - i) Other assets, Due from banks, Treasury Bills, Advances and Investment securities (continued)

The details of these conditions are outlined below.

The SPPI test

For the first step of its classification process, the Bank assesses the contractual terms of financial assets to identify whether they meet the SPPI test.

For the purpose of this test, 'principal' is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (e.g. if there are repayments of principal or amortisation of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Bank applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL or fair value through other comprehensive income (FVOCI) without recycling.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

# 2. Material accounting policies (continued)

# 2.5 Summary of material accounting policies (continued)

- d) Financial assets and liabilities (continued)
  - i) Other assets, Due from banks, Treasury Bills, Advances and Investment securities (continued)

Business model assessment

The Bank determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Bank's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed
- The expected frequency, value and timing of sales are also important aspects of the Bank's assessment

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Bank's original expectations, the Bank does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

# d) Financial assets and liabilities (continued)

# ii) Financial assets at fair value through profit or loss

Financial assets in this category are those that are designated by management upon initial recognition or are mandatorily required to be measured at fair value under IFRS 9. Management may designate an instrument at FVPL upon initial recognition.

The designation eliminates, or significantly reduces, the inconsistent treatment that would otherwise arise from measuring the assets or recognising gains or losses on them on a different basis.

Financial assets at FVPL are recorded in the separate statement of financial position at fair value. Interest earned or incurred on instruments designated at FVPL is accrued in interest income, using the effective interest rate (EIR), taking into account any discount/premium and qualifying transaction costs being an integral part of the instrument. Dividend income from equity instruments measured at FVPL is recorded in profit or loss as other income when the right to the payment has been established.

# iii) Undrawn loan commitments

Undrawn loan commitments and letters of credit are commitments under which, over the duration of the commitment, the Bank is required to provide a loan with pre-specified terms to the customer. These contracts are in the scope of the expected credit loss (ECL) requirements but no ECL was determined based on historical observation of defaults.

#### iv) Debt securities and Other fund raising instruments

Financial liabilities issued by the Bank that are designated at amortised cost, are classified as liabilities under Debt securities in issue and Other fund raising instruments, where the substance of the contractual arrangement results in the Bank having an obligation to deliver cash to satisfy the obligation. After initial measurement, debt issued and other borrowed funds are subsequently measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium on issued funds, and costs that are an integral part of the EIR.

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

# 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

## e) Reclassification of financial assets and liabilities

The Bank does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Bank acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified.

# f) Derecognition of financial assets and liabilities

## Derecognition due to substantial modification of terms and conditions

The Bank derecognises a financial asset, such as a loan to a customer, to facilitate changes to the original loan agreement or arrangement due to weaknesses in the borrower's financial position and/or non-repayment of the debt as arranged and terms and conditions have been restructured to the extent that, substantially, it becomes a new loan, with the difference recognised as an impairment loss. The newly recognised loans are classified as Stage 2 for ECL measurement purposes.

When assessing whether or not to derecognise a loan to a customer, amongst others, the Bank considers the following factors:

- Change in currency of the loan
- Change in counterparty
- If the modification is such that the instrument would no longer meet the SPPI criterion

If the modification does not result in cash flows that are substantially different, the modification does not result in derecognition. Based on the change in cash flows discounted at the original rate (or credit-adjusted EIR for purchased or credit-impaired financial assets), the Bank records a modification gain or loss, to the extent that an impairment loss has not already been recorded.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

## 2. Material accounting policies (continued)

# 2.5 Summary of material accounting policies (continued)

# f) Derecognition of financial assets and liabilities (continued)

# Derecognition other than for substantial modification

Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when the rights to receive cash flows from the financial asset have expired. The Bank also derecognises the financial asset if it has both transferred the financial asset and the transfer qualifies for derecognition.

The Bank has transferred the financial asset if, and only if, either:

- The Bank has transferred its contractual rights to receive cash flows from the financial asset, or
- It retains the rights to the cash flows, but has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement.

Pass-through arrangements are transactions whereby the Bank retains the contractual rights to receive the cash flows of a financial asset (the 'original asset'), but assumes a contractual obligation to pay those cash flows to one or more entities (the 'eventual recipients'), when all of the following three conditions are met:

- The Bank has no obligation to pay amounts to the eventual recipients unless it has collected equivalent amounts from the original asset, excluding short-term advances with the right to full recovery of the amount lent plus accrued interest at market rates
- The Bank cannot sell or pledge the original asset other than as security to the eventual recipients
- The Bank has to remit any cash flows it collects on behalf of the eventual recipients without material delay. In addition, the Bank is not entitled to reinvest such cash flows, except for investments in cash or cash equivalents including interest earned, during the period between the collection date and the date of required remittance to the eventual recipients.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

# 2. Material accounting policies (continued)

### 2.5 Summary of material accounting policies (continued)

f) Derecognition of financial assets and liabilities (continued)

Derecognition other than for substantial modification (continued)

Financial assets (continued)

A transfer only qualifies for derecognition if either:

- The Bank has transferred substantially all the risks and rewards of the asset, or
- The Bank has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

The Bank considers control to be transferred if and only if, the transferee has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without imposing additional restrictions on the transfer.

When the Bank has neither transferred nor retained substantially all the risks and rewards and has retained control of the asset, the asset continues to be recognised only to the extent of the Bank's continuing involvement, in which case, the Bank also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Bank has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration the Bank could be required to pay.

# Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in the separate statement of income.

## 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

# g) Impairment of financial assets

# i) Overview of the ECL principles

The Bank records an allowance for ECL for all loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts, in this section all referred to as 'financial instruments'. Equity instruments are not subject to impairment under IFRS 9.

The Bank uses the general probability of default approach when calculating ECLs. The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss (12mECL). The Bank's policies for determining if there has been a significant increase in credit risk are set out in Note 21.2.5.

The 12mECL is the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Both LTECLs and 12mECLs are calculated on either an individual basis or a collective basis, depending on the size and nature of the underlying portfolio of financial instruments. The Bank's policy for grouping financial assets measured on a collective basis is explained in Note 21.2.6.

Where the financial asset meets the definition of purchased or originated creditimpaired (POCI), the allowance is based on the change in the ECLs over the life of the asset.

The Bank has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

# 2. Material accounting policies (continued)

# 2.5 Summary of material accounting policies (continued)

# g) Impairment of financial assets (continued)

# i) Overview of the ECL principles (continued)

Based on the above process, the Bank classifies its loans and investments into Stage 1, Stage 2, Stage 3 and POCI, as described below:

# Stage 1

When financial assets are first recognised and continue to perform in accordance with the contractual terms and conditions after initial recognition, the Bank recognises an allowance based on 12mECLs. Stage 1 financial assets also include facilities where the credit risk has improved and the financial asset has been reclassified from Stage 2.

### Stage 2

When financial assets have shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. Stage 2 financial assets also include facilities where the credit risk has improved and the financial asset has been reclassified from Stage 3.

### Stage 3

For financial assets considered credit-impaired (as outlined in Note 21.2), the Bank records an allowance for the LTECLs.

## NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

#### 2.5 Summary of material accounting policies (continued)

#### g) Impairment of financial assets (continued)

## i) Overview of the ECL principles (continued)

#### **POCI**

POCI assets are financial assets that are credit-impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the ECLs.

For financial assets for which the Bank has no reasonable expectations of recovering either the entire outstanding amount, or a proportion thereof, the gross carrying amount of the financial asset is reduced. This is considered a partial derecognition of the financial asset.

#### ii) The calculation of ECLs

The Bank calculates ECLs based on the historical measure of cash shortfalls, discounted at the instrument's coupon rate. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

PD - The Probability of Default (PD) is an estimate of the likelihood of default over a given period of time. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio. The concept of PDs is further explained in Note 21.2.4.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 2. Material accounting policies (continued)

#### 2.5 Summary of material accounting policies (continued)

- g) Impairment of financial assets (continued)
  - ii) The calculation of ECLs (continued)
  - EAD The Exposure at Default (EAD) is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.
  - LGD The Loss Given Default (LGD) is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the EAD.

When estimating the ECLs, the Bank considers among other factors the risk rating category and aging of the financial asset. Each of these is associated with different PDs, EADs and LGDs. When relevant, it also incorporates how defaulted loans and investments are expected to be recovered, including the value of collateral or the amount that might be received for selling the asset.

With the exception of credit cards and other revolving facilities, for which the treatment is separately set out, the maximum period for which the credit losses are determined is the contractual life of a financial instrument.

Impairment losses and recoveries are accounted for and disclosed separately.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

### g) Impairment of financial assets (continued)

## ii) The calculation of ECLs (continued)

The mechanics of the ECL method are summarised below:

## Stage 1

The 12mECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Bank calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD which are derived as explained under Stage 3 for loans and using Global Credit Loss tables for traded investments and modified with management overlays when not traded.

#### Stage 2

When a financial asset has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. The mechanics are similar to those explained above, but PDs and LGDs are estimated over the lifetime of the instrument. The LGDs are derived as explained under Stage 3 for loans and using Global Credit Loss tables for traded investments and modified with management overlays when not traded.

#### Stage 3

For financial assets considered credit-impaired (as defined in Note 21.2), the Bank recognises the LTECLs for these loans and investments. The method is similar to that for Stage 2 assets, with the PD set at 100%.

#### POCI

POCI assets are financial assets that are credit-impaired on initial recognition. The Bank only recognises the cumulative changes in LTECLs since initial recognition, based on a probability-weighting, discounted by the credit-adjusted EIR.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

#### g) Impairment of financial assets (continued)

## ii) The calculation of ECLs (continued)

In most instances, LGDs are determined on an individual loan or investment basis, including discounting the expected cash flows at the original EIR. Stage 3 LGDs are grouped by similar types to provide percentage averages to be applied for Stage 1 and Stage 2 loans.

In limited circumstances within the Bank, where portfolios were small and the products homogenous with minimal history of defaults, a simplified ECL approach was applied using historical loss rates and staged based on the sovereign rating of the residence of the loan.

### iii) Credit cards, overdrafts and other revolving facilities

The Bank's product offering includes a variety of corporate and retail overdraft and credit cards facilities, in which the Bank has the right to cancel and/or reduce the facilities. The Bank limits its exposure on these revolving facilities to the outstanding balance for non-performing facilities. For Stage 1 and Stage 2 facilities, the Bank calculates ECL on a percentage utilisation of the credit card and overdraft limit based on the Bank's expectations of the customer behaviour, its likelihood of default and the Bank's future risk mitigation procedures, which could include reducing or cancelling the facilities.

The ongoing assessment of whether a significant increase in credit risk has occurred for revolving facilities is similar to other lending products. This is based on shifts in the customer's internal credit grade, as explained in Note 21.2.4, but emphasis is also given to qualitative factors such as changes in usage and repayment patterns.

The interest rate used to discount the ECLs for credit cards is based on the interest rate that is expected to be charged over the expected period of exposure to the facilities. This estimation takes into account that many facilities are repaid in full each month and are consequently charged no interest.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

### 2. Material accounting policies (continued)

#### 2.5 Summary of material accounting policies (continued)

#### g) Impairment of financial assets (continued)

## iv) Treasury Bills, Statutory deposits with Central Bank and Due from banks

Treasury Bills, Statutory deposits with Central Bank and Due from banks are short-term funds placed with the Central Bank of Trinidad and Tobago and correspondent banks. These financial assets have a short contractual term and a highly liquid counterparty; the expected credit loss is estimated to be zero. This is due to the instruments' short remaining contractual life and the counter party's readily available liquid assets that ensure repayment.

#### v) Other assets

The Bank applies the simplified approach when calculating ECLs for other assets as permitted by IFRS 9, which requires expected lifetime losses to be recognised from initial recognition of the assets. All accounts are grouped together based on shared credit risk characteristics and future cash flows are discounted at an appropriate rate. Rates are then calculated based on historical payment profiles and were adjusted to incorporate forward-looking information as of the separate statement of financial position date.

#### vi) Financial guarantees, letters of credit and undrawn loan commitments

The Bank issues financial guarantees, letters of credit and loan commitments. Financial guarantees, letters of credit and loan commitments are off-balance sheet instruments and have no history of default.

#### vii) Forward looking information

The Bank integrates forward-looking indicators (FLIs) and macroeconomic factors into its ECL calculations to estimate potential future credit risks. Key FLIs include interest rates, inflation trends, unemployment rates, and industry-specific forecasts, which help assess the probability of default for financial assets. Broader macroeconomic factors such as GDP growth, current account balance, fiscal deficit and foreign exchange reserves are also considered. The Bank uses scenario analysis and probability-weighted outcomes, best to worst case, to model different economic conditions, ensuring more accurate and robust ECL estimates.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

#### h) Collateral valuation

To mitigate its credit risks on financial assets, the Bank seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories and other non-financial assets. Collateral, unless repossessed, is not recorded on the Bank's separate statement of financial position. However, the fair value of collateral affects the calculation of ECLs. It is generally assessed at inception and re-assessed on a periodic basis.

To the extent possible, the Bank uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral, such as real estate, is valued based on independent valuations and other data provided by third parties.

#### i) Collateral repossessed

The Bank's policy is for a repossessed asset to be sold. Assets to be sold are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date, in line with the Bank's policy.

In its normal course of business, should the Bank repossess properties or other assets in its retail portfolio, it sometimes engages external agents to assist in the sale of these assets to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, the residential properties under legal repossession processes are not recorded on the separate statement of financial position.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

#### 2.5 Summary of material accounting policies (continued)

#### j) Write-offs

The Bank's accounting policy is for financial assets to be written off either partially or in their entirety only when the Bank has stopped pursuing the recovery. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to other income.

#### k) Investment in associated companies

Associates are all entities over which the Bank has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The Bank's investments in associates are accounted for at stated cost less any impairment.

Subsequent to initial recognition, the Bank determines whether it is necessary to recognise an impairment loss on its investment in its associates. At each reporting date, the Bank determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Bank calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value, and then recognises the loss in the separate statement of income.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

#### l) Leases

The Bank assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### Bank as a Lessee

The Bank applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Bank recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

#### Right-of-use assets

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease term.

#### Lease liabilities

At the commencement date of the lease, the Bank recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (less any lease incentives receivable), variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the entity and payments of penalties for terminating the lease, if the lease term reflects exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses in the period in which the event or condition that triggers the payment occurs.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 2. Material accounting policies (continued)

### 2.5 Summary of material accounting policies (continued)

### 1) Leases (continued)

Lease liabilities (continued)

In calculating the present value of lease payments, the Bank uses its incremental borrowing rate (IBR) at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term or a change in the lease payments (e.g. changes to future payments resulting from a change in rate used to determine such lease payments).

The Bank applies the short-term lease recognition exemption to its short-term leases of property etc. (i.e. those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of IT equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

#### Bank as a Lessor

Leases in which the Bank does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the separate statement of income due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 2. Material accounting policies (continued)

### 2.5 Summary of material accounting policies (continued)

### m) Premises and equipment

Premises and equipment are stated at cost less accumulated depreciation.

Subsequent costs are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the separate statement of income during the financial period in which they are incurred.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each separate statement of financial position date. Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These are included in the separate statement of income.

Leasehold improvements, equipment, furniture and fittings are depreciated on a straight-line basis over their estimated useful lives. Depreciation on freehold premises is computed on the declining balance method at rates expected to apportion the cost of the assets over their estimated useful lives.

The depreciation rates used are as follows:

Freehold premises 2%
Leasehold premises Straight line based on lease term
Furniture and fittings Straight line 10 - 60 years
Equipment (computers, software, servers,
other hardware etc.) Straight line 4 - 8 years

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

## n) Impairment of non-financial assets

Further disclosures relating to impairment of non-financial assets are also provided in the following notes:

- Disclosures for significant assumptions (Note 3)
- Premises and equipment (Note 7)

The Bank assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Bank estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows available to shareholders are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

#### n) Impairment of non-financial assets (continued)

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Bank estimates the asset's or CGU's recoverable amount.

### o) Employee benefits

### i) Pension obligations

The Bank operates defined benefit plans, the assets of which are generally held in separate trustee-administered funds. The pension plans are generally funded by payments from the Bank, taking account of the recommendations of independent qualified actuaries who carry out the full valuation of the Plans every three years. The Bank, took the actuary's advice regarding a pension holiday, effective January 1999.

Annually, the Bank's independent actuaries conduct a valuation exercise to measure the effect of employee benefit plans.

The starting point for this year's IAS 19, 'Employee Benefits' disclosures is the corresponding disclosures for the year ended September 30, 2024. These disclosures were based on an actuarial valuation of the Plans' liabilities carried out at September 30, 2023 rolled forward by one year. An actuarial valuation of the Plan's liabilities has been carried out at September 30, 2023 rolled forward using a combination of asset, liabilities, person-by-person, and global data to September 30, 2025. In doing this the actuaries have allowed for the further accrual of benefits and the increase in liabilities arising from actual and outstanding salary increases and pension increases during the period under review. The actuaries have assumed that the Plans' membership changes during the period under review have followed the demographic assumptions adopted for last year's IAS 19 disclosures rather than allowing for the actual changes in membership.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

## o) Employee benefits (continued)

#### i) Pension obligations (continued)

Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling (excluding amounts included in net interest on the net defined benefit liability) and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the separate statement of financial position with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to the separate statement of income in subsequent periods.

Past service costs are recognised in the separate statement of income on the earlier of:

- a) The date of the plan amendment or curtailment, and
- b) The date that the Bank recognises related restructuring costs.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Bank recognises the following changes in the net defined benefit obligation under 'operating expenses' in the separate statement of income:

- a) Service costs comprising current service costs, past service costs, gains and losses on curtailments and non-routine settlements
- b) Net interest expense or income

The defined benefit plans mainly expose the Bank to risks such as investment risk, interest rate risk and longevity risk.

The above accounting requirement in no way affects the pension plans which continue to be governed by the approved Trust Deed and Rules and remain under the full control of the appointed Trustees.

The full results of the valuation exercise are disclosed in Note 9 to these separate financial statements.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

## o) Employee benefits (continued)

#### ii) Other post-retirement obligations

The Bank provides post-retirement medical benefits to its retirees. The entitlement to these benefits is usually based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the shortest period of service that an employee must complete up to the date the employee is first eligible to retire early in normal health, using a methodology similar to that for defined benefit pension plans. Independent qualified actuaries carry out a valuation of these obligations.

Post-retirement medical cover at the Bank's expense came to an end on December 31, 2024.

## iii) Profit sharing scheme

The Bank operates an employee profit sharing scheme, which is administered by Trustees in accordance with terms outlined in the Profit Sharing Scheme Rules. The profit share to be distributed to employees each year is based on a specific formula outlined in the Profit Sharing Scheme Rules. Employees of RBL have the option to receive their profit share allocation in cash (up to a maximum of 75% of the total entitlement) and receive the balance in ordinary shares of RFHL. The number of shares to be allocated is based on the employees' total entitlement less the cash element, divided by the average price of the unallocated shares purchased by the Trustees. The Bank accounts for the profit share, as an expense, through the separate statement of income.

#### iv) Share-based payments

Employees of the Bank receive remuneration in the form of share-based payments, whereby employees render services as consideration for equity instruments (equity-settled transactions) of the Parent company, RFHL.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

#### p) Taxation

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the separate financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the separate statement of financial position date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised where it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Income tax payable on profits, based on the applicable tax law in each jurisdiction, is recognised as an expense in the period in which profits arise. The tax effects of income tax losses available for carry forward are recognised as an asset when it is probable that future taxable profits will be available against which these losses can be utilised.

#### q) Statutory reserves

Statutory reserves represent accumulated transfers from net profit after deduction of taxes in each year for the Bank to a statutory reserve account until the balance on this reserve is not less than the paid-up capital. In Trinidad, there is also a requirement to maintain statutory reserves of at least twenty times its deposit liabilities. These reserves are not available for distribution as dividends or any other form of appropriation. Statutory reserves amounted to \$1.4 billion (2024: \$1.4 billion).

#### r) Fiduciary assets

The Bank provides custody, trustee and investment management services to third parties. All related assets are held in a fiduciary capacity and are not included in these separate financial statements as they are not the assets of the Bank. These assets under administration at September 30, 2025, totalled \$40.2 billion (2024: \$39.5 billion).

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

## s) Foreign currency translation

Monetary assets and liabilities, which are denominated in foreign currencies are expressed in Trinidad and Tobago dollars at rates of exchange ruling on September 30. Non-monetary assets and liabilities denominated in foreign currencies are translated at historic rates. All revenue and expenditure transactions denominated in foreign currencies are translated at mid-exchange rates and the resulting profits and losses on exchange from these trading activities are dealt with in the separate statement of income.

#### t) Revenue recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Bank expects to be entitled in exchange for goods or services. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty. The Bank has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements, has pricing latitude and is also exposed to credit risks.

The specific recognition criteria described below must also be met before revenue is recognised.

#### The EIR method

Interest income and expense is recorded using the EIR method for all financial instruments measured at amortised cost. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

## t) Revenue recognition (continued)

The EIR method (continued)

The EIR (and therefore, the amortised cost of the asset) is calculated by taking into account any discount/premium on acquisition, fees and costs that are an integral part of the EIR. The Bank recognises interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loan. Hence, it recognises the effect of potentially different interest rates charged at various stages, and other characteristics of the product life cycle (including prepayments, penalty interest and charges).

### Interest income and expense

The Bank calculates interest income and expense by applying the EIR to the gross carrying amount of financial assets and liabilities other than credit-impaired assets. For POCI financial assets, a credit-adjusted EIR is applied to the amortised cost of the financial asset.

Interest income on all trading assets and financial assets mandatorily required to be measured at FVPL is recognised using the contractual interest rate in net trading income and net gains or losses on financial assets at FVPL, respectively.

#### Fee and commission income

The Bank earns fee and commission income from a diverse range of financial services it provides to its customers. Fee and commission income is recognised at an amount that reflects the consideration to which the Bank expects to be entitled in exchange for providing the services. The performance obligations, as well as the timing of their satisfaction, are identified, and determined, at the inception of the contract.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

## t) Revenue recognition (continued)

Fee and commission income (continued)

When the Bank provides a service to its customers, consideration is invoiced and generally due immediately upon satisfaction of a service provided at a point in time or at the end of the contract period for a service provided over time. The Bank has generally concluded that it is the principal in its revenue arrangements because it typically controls the services before transferring them to the customer.

Credit card fees and commissions are recognised at an amount that reflects the consideration to which the Bank expects to be entitled in exchange for providing the services. Credit card fees and commissions are therefore net of amounts paid as the expenses for the direct cost of satisfying the performance obligation is netted against the revenues received.

Dividends

Dividend income is recognised when the right to receive the payment is established.

#### u) Fair value

The Bank measures financial instruments at fair value at each separate statement of financial position date. Fair value related disclosures for financial instruments and non-financial assets that are measured at fair value, where fair values are disclosed, are shown in Note 23 to the separate financial statements.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i) In the principal market for the asset or liability, or
- ii) In the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

### u) Fair value (continued)

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Bank uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the separate financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

#### Level 1

Included in the Level 1 category are financial assets and liabilities that are measured in whole or in part by reference to published quotes in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis.

#### Level 2

Included in the Level 2 category are financial assets and liabilities that are measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions and for which pricing is obtained via pricing services, but where prices have not been determined in an active market. This includes financial assets with fair values based on broker quotes, investments in private equity funds with fair values obtained via fund managers and assets that are valued using the Bank's own models whereby the majority of assumptions are market observable.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

### u) Fair value (continued)

#### Level 3

Included in the Level 3 category are financial assets and liabilities that are not quoted as there are no active markets to determine a price. These financial instruments are held at cost, being the fair value of the consideration paid for the acquisition of the investment, and are regularly assessed for impairment.

For assets and liabilities that are recognised in the separate financial statements on a recurring basis, the Bank determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Where the Bank's investments are not actively traded in organised financial markets, the fair value is determined using discounted cash flow analysis, which requires considerable judgement in interpreting market data and developing estimates. Accordingly, estimates contained herein are not necessarily indicative of the amounts that the Bank could realise in a current market exchange. The use of different assumptions and/or estimation methodologies may have a material effect on the estimated fair values. Management is not aware of any factors that would significantly affect the estimated fair value amounts.

Investments classified as FVPL are actively traded in organised markets and fair value is determined by reference to the market price at year end or on the last trade date prior to year end.

Financial instruments where carrying value is equal to fair value:- Due to their short-term maturity, the carrying value of certain financial instruments is assumed to approximate their fair values. These include cash, due from banks and Treasury Bills, investment securities, investment interest receivable and payable, customers' deposit accounts, other fund raising instruments, other assets and other liabilities.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

### u) Fair value (continued)

#### Level 3 (continued)

Advances are net of specific and other provisions for impairment. The fair value of advances is based on a current yield curve appropriate for the remaining term to maturity.

The fair value of the floating rate debt securities in issue is based on quoted market prices where available and where not available is based on a current yield curve appropriate for the remaining term to maturity. For balances due to banks, where the maturity period is less than one year, the fair value is assumed to equal carrying value. Where the maturity period is in excess of one year, these are primarily floating rate instruments, the interest rates of which reset with market rates, therefore the carrying values are assumed to equal fair values.

The fair value of fixed rate debt securities carried at amortised cost is estimated by comparing market interest rates when they were first recognised with current market rates offered for similar financial instruments. The estimated fair value of fixed interest-bearing deposits is based on discounted cash flows using prevailing money market interest rates for facilities with similar credit risk and maturity.

# v) Customers' liabilities under acceptances, guarantees, indemnities and letters of credit

These represent the Bank's potential liability, for which there are equal and offsetting claims against its customers in the event of a call on these commitments. These amounts are not recorded on the Bank's separate statement of financial position but are detailed in Note 27 (b) to these separate financial statements.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 2. Material accounting policies (continued)

## 2.5 Summary of material accounting policies (continued)

## w) Equity reserves

The reserves recorded in equity on the Bank's separate statement of financial position include:

Stated capital - ordinary stated capital is classified within equity and is recognised at the fair value of the consideration received by the Bank.

Statutory reserves that qualify for treatment as equity are discussed in Note 2.5 (q).

## x) Comparative information

Where necessary, comparative figures have been adjusted to conform to changes in presentation in the current year. These changes had no impact on the Bank's net assets, profit for the year and retained earnings for the year ended September 30, 2025.

#### 3. Significant accounting judgements, estimates and assumptions

The preparation of the Bank's separate financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Other disclosures relating to the Bank's exposure to risks and uncertainties include:

- a. Risk management (Note 21)
- b. Capital management (Note 22)

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 3. Significant accounting judgements, estimates and assumptions (continued)

#### **Estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Bank based its assumptions and estimates on parameters available when the separate financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Bank. Such changes are reflected in the assumptions when they occur.

Impairment losses on financial assets (Note 4 and Note 5)

The measurement of impairment losses under IFRS 9 across all categories of financial assets requires judgement. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Bank's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- The estimation of the amount and timing of future cash flows and collateral values when determining impairment losses
- The Bank's internal credit grading model, assigns grades for corporate facilities and this was the basis for grouping PDs
- The Bank's criteria for assessing if there has been a significant increase in credit risk and so, allowances for financial assets should be measured on a LTECL basis and the qualitative assessment
- Development of ECL models, including the various formulae and the choice of inputs

## NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 3. Significant accounting judgements, estimates and assumptions (continued)

#### **Estimates and assumptions** (continued)

Impairment losses on financial assets (Note 4 and Note 5) (continued)

- Determination of the existence of associations between macroeconomic scenarios and economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs
- The inclusion of overlay adjustments based on judgement and future expectations

## Other assumptions

*Net pension asset/liability (Note 9)* 

In conducting valuation exercises to measure the effect of the employee benefit plan to the Bank, the Banks' independent actuary uses judgement and assumptions in determining discount rates, salary increases, NIS ceiling increases, pension increases and the rate of return on the assets of the Plan.

#### Deferred taxes (Note 10)

In calculating the provision for deferred taxation, management uses judgement to determine the probability that future taxable profits will be available to facilitate utilisation of temporary tax differences which may arise.

#### **Judgements**

In the process of applying the Bank's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the separate financial statements:

#### *Premises and equipment (Note 7)*

Management exercises judgement in determining whether costs incurred can accrue sufficient future economic benefits to the Bank to enable the value to be treated as a capital expense. Further judgement is used upon annual review of the residual values and useful lives of all capital items to determine any necessary adjustments to carrying value.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

### 3. Significant accounting judgements, estimates and assumptions (continued)

#### Judgements (continued)

Leases (Note 8)

The Bank determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Bank has several lease contracts that include extension and termination options. The Bank applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Bank reassesses the lease term if there is a significant event or change in circumstances that is within its control that affects its ability to exercise or not to exercise the option to renew or to terminate (e.g. construction of significant leasehold improvements or significant customisation of the leased asset).

The Bank cannot readily determine the interest rate implicit in the lease, therefore, it uses its IBR to measure lease liabilities. The IBR is the rate of interest that the Bank would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Bank 'would have to pay', which requires estimation when no observable rates are available (such as for entities that do not enter into financing transactions) or when they need to be adjusted to reflect the terms and conditions of the lease (e.g. when leases are not in the entity's functional currency). The Bank estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific adjustments (such as the entity's stand-alone credit rating, or to reflect the terms and conditions of the lease).

### Assessment of control

Management uses judgement in performing a control assessment review on all mutual funds and retirement plans sponsored by the Bank. This assessment revealed that the Bank is unable to exercise power over the activities of the funds/plans and is therefore not deemed to be in control of any of the mutual funds and retirement plans.

Of the total ECL of \$0.8 billion, 0.07% was on a collective basis and 99.93% was on an individual basis.

#### e) Restructured/Modified loans

Within the retail and credit card portfolios, management will in the normal course of business modify the terms and conditions of facilities in the case of difficulties by the borrower. These modifications rarely result in an impairment loss and if it does, it is not material.

The Bank occasionally makes modifications to the original terms of large commercial and corporate loans as a response to the borrower's financial difficulties, rather than taking possession or to otherwise enforce collection of collateral. These modifications are made only when the Bank believes the borrower is likely to meet the modified terms and conditions. Indicators of financial difficulties include defaults on covenants, overdue payments or significant concerns raised by the Credit Risk Department. Once the terms have been renegotiated, any impairment is measured using the original EIR as calculated before the modification of terms.

## NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 6. Investment in associated and subsidiary companies

a)	Investment in associated companies	2025	2024
	G4S Holdings (Trinidad) Limited	1	1
	InfoLink Services Limited	3	3
		4	4

The Bank's interest in associated companies is as follows:

	Country of incorporation	Reporting year end of associate	Proportion of issued capital held
G4S Holdings (Trinidad) Limited	Trinidad and Tobago	December	24.50%
InfoLink Services Limited	Trinidad and Tobago	December	25.00%

Summarised financial information in respect of the Bank's associates is as follows:

			Total investment in associates		
		2025	2024		
	Total assets	398	356		
	Total liabilities	51	47		
	Net assets/equity	347	309		
	Profit for the period	40	37		
b)	Investment in subsidiaries				
	Republic Caribbean Investments Limited	654	654		
	Others	64	49		
		718	703		

On August 6, 2025, an additional TT\$15 million was injected into the Bank's wholly owned subsidiary, Republic Trustee Services Limited, to satisfy the minimum capital requirements of the Collective Investment Scheme Bye Laws which were promulgated on May 8, 2025.

# Capital works in progress

Included in premises and equipment at September 30, 2025 and 2024 are projects across the Bank at various stages of completion. These projects mainly consist of information technology implementations and upgrades as well as building improvements.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

# 8. Right-of-use assets and Lease liabilities

a) Right-of-use assets		Leasehold Premises		
		2025	2024	
	Cost			
	At beginning of year	545	401	
	Lease modifications	10	51	
	Additions at cost		93	
	At end of year	555	545	
	Accumulated depreciation			
	At beginning of year	223	176	
	Charge for the year - Note 17(d)	50	47	
	At end of year	<u> 273</u>	223	
	Net book value	282	322	

Leasehold premises generally have lease terms between 2 and 30 years.

## b) Lease liabilities

	2025	2024
At beginning of year	345	243
Additions at cost	_	93
Accretion of interest expense - Note 17(b)	19	18
Less: payments	(66)	(60)
Other adjustments	11	51
At end of year	<u>309</u>	345
Non-current	251	280
Current	58	65

The contractual maturity analysis of these lease liabilities are disclosed in Note 21.3.1.

## NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 8. Right-of-use assets and Lease liabilities (continued)

## b) Lease liabilities (continued)

Payments	2025	2024
Fixed rent	66	60

The value of rental expense in relation to short-term leases is \$3.6 million (2024: \$3.6 million) and low-value leases is \$3 million (2024: \$3 million) for financial year 2025.

The Bank has several lease contracts that include extension and termination options. These options are negotiated by management to provide flexibility in managing the leased-asset portfolio and align with the Bank's business needs. Management exercises significant judgement in determining whether these extension and termination options are reasonably certain to be exercised.

#### c) Bank as a lessee

The following are the amounts recognised in the separate statement of income:

	2025	2024
Depreciation expense of right-of-use assets	50	47
Interest expense on lease liabilities	19	18
Expense relating to leases of low-value assets (included		
in administrative expenses)	7	7
	76	72

The Bank had total cash outflows for leases of \$66 million in 2025 (\$60 million in 2024). The Bank had no non-cash additions to right-of-use assets and lease liabilities in 2025 (2024: right-of-use assets \$93 million and lease liabilities \$93 million).

## NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 9. Employee benefits

The Bank has defined benefit pension plans and also funds post-employment healthcare benefits to employees. The Bank's defined benefits plans are the final salary plans for employees, which requires contributions to be made to a separately administered fund.

The Plan's assets consists of investments in government, corporate and foreign securities, local and foreign equities, mortgages, investment properties, managed funds and cash and cash equivalents. There are no asset-liability matching strategies used by the Plans.

It is the Plan's policy to enter into financial arrangements with a variety of creditworthy counterparties and monitor the size of the exposure to any one issues and the duration of the investment. The Plan's investments are susceptible to market price risk arising from uncertainties about future prices whereby changes in interest rates may affect the value of securities, risks associated with fluctuations in foreign currency rates, and changes in the life expectancies for pensioners.

Post-retirement medical cover at the Bank's expense came to an end on December 31, 2024.

#### a) The amounts recognised in the separate statement of financial position are as follows:

	Defined benefit pension plans		Post-retirement medical benefits	
	2025	2024	2025	2024
Present value of defined

Closing net pension				
asset/(medical liability)	837	902	<u> </u>	(1)

## NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

### 9. Employee benefits (continued)

## d) Liability profile

The defined benefit obligation is allocated amongst the Plan's members as follows:

		Defined benefit pension plans	Post-retirement medical benefits	
-	Active members	50%	7%	
-	Deferred members	5%	N/A	
-	Pensioners	45%	93%	

The weighted duration of the defined benefit obligation was 13.9 years for the pension benefit.

29% of the defined benefit obligation for active members was conditional on future salary increases.

98% of the benefits for active members were vested for the defined benefit obligation.

There are no asset-liability matching strategies used by the Plans.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

# 9. Employee benefits (continued)

## e) Changes in the fair value of plan assets are as follows:

	Defined benefit pension plans		
	2025	2024	
Opening fair value of plan assets	4,215	4,072	
Interest income	269	260	
Return on plan assets, excluding interest income	(37)	41	
Benefits paid	(145)	(156)	
Expense allowance	(2)	(2)	
Closing fair value of plan assets	4,300	4,215	
Actual return on plan assets	233	302	

# f) Plan asset allocation as at

September 30:	Defined benefit pension plans			
	Fair value		Allocation	
	2025	2024	2025	2024
Equity securities	2,573	2,443	59.84%	57.95%
Debt securities	1,578	1,545	36.70%	36.67%
Property	10	10	0.23%	0.22%
Money market	139	217	3.23%	<u>5.16%</u>
Total fair value of plan	4,300	4,215	<u>100.00%</u>	<u>100.00%</u>

Included in the money market instruments/cash are \$29 million (2024: \$26.6 million) held with the Bank.

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

# 9. Employee benefits (continued)

## g) The amounts recognised in the separate statement of income are as follows:

	Defined benefit pension plans		
	2025	2024	
Current service cost Interest on defined benefit	105	92	
obligation	(55)	(54)	
Administration expenses	2	2	
Total included in staff costs	52	40	

## h) Remeasurements recognised in other comprehensive income:

	Defined benefit pension plans		Post-retirement medical benefits	
	2025	2024	2025	2024
Experience (losses)/gains	(14)	51	_	1
Effect of asset ceiling	1	2		
Total included in other comprehensive income	(13)	53		1

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

# 9. Employee benefits (continued)

# i) Summary of principal actuarial assumptions as at September 30:

	2025	2024
	0/0	%
Discount rate	1.00 - 6.50	1.00 - 6.50
Rate of salary increase	4.50	4.50
Pension increases	2.40	2.40
Medical cost trend rates	0.00	5.75

Assumptions regarding future mortality are based on published mortality rates. The life expectancies underlying the value of the defined benefit obligation as at September 30, are as follows:

	Defined benefit pension plans	
	2025	2024
Life expectancy at age 60 - 65 for current pensioner in		
- Male	22.0	22.0
- Female	26.3	26.2
Life expectancy at age 60 - 65 for current members age		
40 in years:		
- Male	22.9	22.8
- Female	27.2	27.1
	Post-retirement n benefits	nedical
		nedical 2024
Life expectancy at age 60 - 65 for current pensioner in	benefits	
Life expectancy at age 60 - 65 for current pensioner in - Male	benefits	
· · · · · · · · · · · · · · · · · · ·	benefits	2024
- Male	benefits	<b>2024</b> 22.0
<ul><li>Male</li><li>Female</li></ul>	benefits	<b>2024</b> 22.0

<ul> <li>Male</li> <li>Female</li> <li>Life expectancy at age 60 - 65 for current members age</li> <li>40 in years:</li> </ul>	benefits	2024 22.0 26.2

## NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 9. Employee benefits (continued)

## j) Sensitivity analysis

The calculations of the defined benefit and medical obligations are sensitive to the assumptions used. The following table summarises how these obligations as at September 30, would have changed as a result of a change in the assumptions used.

Defined benefit pension

	plans		
2025	1% p.a. increase	1% p.a. decrease	
- Discount rate	(425)	473	
- Future salary increases	197	(170)	
- Future pension cost	342	(288)	
2024			
- Discount rate	(406)	452	
- Future salary increases	188	(163)	
- Future pension cost	327	(276)	

An increase of one year in the assumed life expectancies shown above would increase the defined benefit obligation at September 30, 2025, by \$64 million (2024: \$61 million) and the post-retirement medical benefit would not materially increase.

These sensitivities were calculated by re-calculating the defined benefit obligations using the revised assumptions.

#### k) Funding

The Bank meets the entire cost of funding the Plans. The funding requirements are based on regular actuarial valuations of the Plans made every three years and the assumptions used to determine the funding required may differ from those set out above. The Bank expects to pay nothing to the Plans in 2025/2026.

## 20. Related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operating decisions. A number of banking transactions are entered into with related parties in the normal course of business. These transactions are both secured and unsecured and were carried out on commercial terms and conditions, at market rates. The advances, investments and other assets are gross of ECLs.

#### 21. Risk management

#### 21.1 General

The Bank's prudent banking practices are founded on solid risk management. In an effort to keep apace with its dynamic environment, the Bank has established a comprehensive framework for managing risks, which is continually evolving as the Bank's business activities change in response to market, credit, product and other developments.

The basic principles of risk management followed by the Bank include:

- Managing risk within parameters approved by the Board of Directors and Executives;
- Assessing risk initially and then consistently monitoring those risks through their life cycle;
- Abiding by all applicable laws, regulations and governance standards in every country in which we do business;
- Applying high and consistent ethical standards to our relationships with all customers, employees and other stakeholders; and
- Undertaking activities in accordance with fundamental control standards. These controls include the disciplines of planning, monitoring, segregation, authorisation and approval, recording, safeguarding, reconciliation and valuation.

#### 21. Risk management (continued)

#### **21.1 General** (continued)

The Board of Directors has ultimate responsibility for the management of risk within the Bank. Acting with authority delegated by the Board, the Credit, Audit, Asset/Liability Committee (ALCO) and Enterprise Risk Committee, review specific risk areas.

A Group Enterprise Risk Management unit exists headed by a Chief Risk Officer, with overall responsibility for ensuring compliance with all risk management policies, procedures and limits.

The Internal Audit function audits Risk Management processes throughout the Bank by examining both the adequacy of the procedures and the Bank's compliance with these procedures. Internal Audit discusses the results of all assessments with Management and reports its findings and recommendations to the Audit Committee of the Bank.

The Bank's activities are primarily related to the use of financial instruments. The Bank accepts funds from customers and seeks to earn above average interest margins by investing in high quality assets such as government and corporate securities as well as equity investments and seeks to increase these margins by lending for longer periods at higher rates, while maintaining sufficient liquidity to meet all claims that might fall due.

The main risks arising from the Bank's financial instruments are credit risk, interest rate and market risk, liquidity risk, foreign currency risk and operational risk. The Bank reviews and agrees policies for managing each of these risks as follows:

#### 21.2 Credit risk

Credit risk is the potential that a borrower or counterparty will fail to meet its stated obligations in accordance with agreed terms. The objective of the Bank's credit risk management function is to maximise the Bank's risk-adjusted rate of return by maintaining credit risk exposure within acceptable parameters. The effective management of credit risk is a key element of a comprehensive approach to risk management and is considered essential to the long-term success of the Bank.

The Bank's credit risk management process operates on the basis of a hierarchy of discretionary authorities. A Board Credit Committee, including executive and non-executive directors, is in place, with the authority to exercise the powers of the Board on all risk management decisions.

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 21. Risk management (continued)

#### 21.2 Credit risk (continued)

The Risk Management unit is accountable for the general management and administration of the Bank's credit portfolio, ensuring that lendings are made in accordance with current legislation, sound banking practice and in accordance with the applicable general policy of the Board of Directors. The Risk Management function is kept separate from and independent of the business development aspect of the operations.

The Bank uses a risk rating system which groups commercial/corporate accounts and overdrafts into various risk categories to facilitate the management of risk on both an individual account and portfolio basis. Retail lending, mortgages and retail overdrafts are managed by product type. Preset risk management criteria is in place at all branches to facilitate decision-making for all categories of loans including credit cards. Trend indicators are also used to evaluate risk as improving, static or deteriorating. The evaluation of the risk and trend inform the credit decision and determines the intensity of the monitoring process.

The debt securities within the Bank's investment security portfolio are exposed to credit risk and are managed by investment grading or country exposure with preset exposure limits as approved by the Board of Directors. The credit quality of each individual security is assessed based on the financial strength, reputation and market position of the issuing entity and the ability of that entity to service the debt.

The Bank avoids exposure to undue concentrations of risk by placing limits on the amount of risk accepted from a number of borrowers engaged in similar business activities, or activities in the same geographic region or with similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Such risks are controlled and monitored on a revolving basis and are subject to an annual or more frequent review. Limits on the level of credit risk by product, industry sector, client and geography are approved by the Board of Directors.

The Bank's credit control processes emphasise early detection of deterioration and prompt implementation of remedial action and where it is considered that recovery of the outstanding balance may be doubtful or unduly delayed, such accounts are transferred from performing to non-performing status.

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 21. Risk management (continued)

### 21.2 Credit risk (continued)

### 21.2.1 Analysis of risk concentration

The Bank's concentrations of risk are managed by client/counterparty, geographical region and industry sector. The table below shows the Bank's maximum exposure to any client or counterparty before taking into account collateral or other credit enhancements.

	Gross maximum exposure		
	2025	2024	
Statutory deposits with Central Bank	3,299	3,326	
Due from banks	1,265	2,402	
Treasury Bills	902	694	
Advances	37,078	33,898	
Investment securities	4,632	5,490	
Due from Parent company	272	272	
Investment interest receivable	59	56	
Total	47,507	46,138	
Undrawn commitments	2,623	2,586	
Acceptances	1,782	1,845	
Letters of credit	103	303	
Total	4,508	4,734	
Total credit risk exposure	52,015	50,872	

Where financial instruments are recorded at fair value, the amounts shown represent the current credit risk exposure but not the maximum risk exposure that could arise in the future as a result of changes in values.

## NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

### 21. Risk management (continued)

## 21.2 Credit risk (continued)

#### **21.2.1** Analysis of risk concentration (continued)

### a) Industry sectors

The following table shows the risk concentration by industry for the Bank. Additional disclosures for credit quality and the maximum exposure for credit risk per categories based on the Bank's internal credit rating system and year-end stage classification are further disclosed in Notes 4 (d) and 5 (b).

	2025	2024
Government and Central		
Government Bodies	8,214	8,651
Financial sector	2,394	3,682
Energy and mining	1,808	1,658
Agriculture	508	279
Electricity and water	678	501
Transport, storage and		
communication	955	1,023
Distribution	4,485	4,588
Real estate	3,196	2,828
Manufacturing	2,622	2,349
Construction	2,591	2,573
Hotel and restaurant	807	761
Personal	18,273	16,644
Other services	5,484	5,335
	52,015	50,872

Credit exposure with state-owned bodies have been categorised according to the service offered by the organisation rather than within 'Government and Central Government Bodies'.

### 21. Risk management (continued)

# 21.2 Credit risk (continued)

## 21.2.1 Analysis of risk concentration (continued)

#### b) Geographical sectors

The Bank's maximum credit exposure, after taking account of credit loss provisions established but before taking into account any collateral held or other credit enhancements, can be analysed by the following geographical regions based on the country of domicile of its counterparties:

	2025	2024
Trinidad and Tobago	47,584	46,201
Barbados	227	312
Eastern Caribbean	542	533
Guyana	319	288
United States	1,542	1,257
Europe	1,018	1,237
Suriname	82	230
Other Countries	701	814
	52,015	50,872

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

### 21. Risk management (continued)

#### 21.2 Credit risk (continued)

#### 21.2.2 Impairment assessment

Financial asset provisions are reviewed quarterly in accordance with established guidelines and recommended provisions arising out of this review are submitted to the Board for approval. Non-performing debts recommended for write-off are also reviewed annually and action taken in accordance with prescribed guidelines. The Bank's impairment assessment and measurement approach is set out below.

#### 21.2.3 Default and recovery

The Bank generally considers a financial instrument defaulted and therefore Stage 3 (credit-impaired) for ECL calculations in cases when the borrower becomes 90 days past due on its contractual payments.

As a part of a qualitative assessment of whether a customer is in default, the Bank also considers a variety of instances that may indicate unlikeliness to pay. When such events occur, the Bank carefully considers whether the event should result in treating the customer as defaulted and therefore assessed as Stage 3 for ECL calculations or whether Stage 2 is appropriate.

It is the Bank's policy to consider a financial instrument as 'recovered' and therefore re-classified out of Stage 3 when none of the default criteria have been present for at least six consecutive months. The decision whether to classify an asset as Stage 2 or Stage 1 once recovered depends on the updated credit grade, at the time of recovery.

## NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 21. Risk management (continued)

#### 21.2 Credit risk (continued)

## 21.2.4 The Bank's internal rating and PD estimation process

Commercial and corporate lending and mortgages

The Bank has an independent internal credit risk department. Risk ratings were selected as cohorts for PD analyses. A vintage approach was applied looking at the movements of ratings over a period of time. Historical PDs were developed and using statistical correlation between macroeconomic trends and historical default rates, management applied overlays based on expectations. As previously mentioned, LGD percentage estimates were developed based on historical loss trends for non-performing loans which are assessed on an individual level including estimating the present value of future cash flows. EAD equals the loan balance outstanding plus accrued interest.

#### Retail lending and mortgages

Product types were selected as the cohorts for PD analyses for retail lending and retail mortgages. A vintage approach was applied looking at the number of defaults by segment over a period of time. Historical PDs were developed and using correlation between macroeconomic trends, management applied overlays based on expectations. LGD percentage estimates were developed based on historical loss trends for non-performing loans which are assessed on both an individual and collective level. EAD equals the loan balance outstanding plus accrued interest.

#### Overdrafts and credit cards

Many corporate customers are extended overdraft facilities and the PDs developed for the corporate portfolio were applied. LGDs for the corporate portfolio was also utilised for overdrafts. EADs were developed based on historical trends in utilisation of overdraft limits. ECL percentages for the retail portfolio were utilised for retail overdrafts. PDs for the credit card portfolio were developed using default percentages over a period of time. EADs were developed based on historical trends in utilisation of credit card limits and LGD percentage estimates were developed based on historical loss trends for a sample of credit card non-performing facilities.

## NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 21. Risk management (continued)

#### 21.2 Credit risk (continued)

#### 21.2.4 The Bank's internal rating and PD estimation process (continued)

Overdrafts and credit cards (continued)

Management judgementally applied overlays as required as there was no noted correlation between macroeconomic trends and historical default rates.

Investment securities and investment interest receivable

PDs and LGDs for traded instruments were based on the global credit ratings assigned to the instrument or the country for sovereign exposures. PDs and LGDs for non-traded instruments were based on one notch below the credit rating of the sovereign in which the instrument is issued or, on company ratings where they existed. Management applied judgemental overlays based on local debt instruments. EAD equals the amortised security balance plus accrued interest.

Treasury Bills, Statutory deposits with Central Bank and Due from banks

Treasury Bills, Statutory deposits with Central Bank and Due from banks are short term funds placed with the Central Bank of Trinidad and Tobago and correspondent banks and the Bank therefore considers the risk of default to be very low. These facilities are highly liquid and without restriction and based on management's review of the underlying instruments the ECL on these instruments were determined to be zero.

Financial guarantees, letters of credit and undrawn loan commitments

The Bank issues financial guarantees, letters of credit and loan commitments.

Financial guarantees, letters of credit and loan commitments are off-balance sheet instruments and have no history of default. As a result, the Bank considers the risk of default to be very low and the ECLs on these instruments were determined to be zero.

## NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 21. Risk management (continued)

### 21.2 Credit risk (continued)

#### 21.2.5 Significant increase in credit risk

The Bank continuously monitors all assets subject to ECLs. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Bank assesses whether there has been a significant increase in credit risk since initial recognition.

The Bank also applies a secondary qualitative method for triggering a significant increase in credit risk for an asset, such as moving a customer/facility to a watch list. Regardless of the change in credit grades, if contractual payments are more than 30 days past due, the credit risk is deemed to have increased significantly since initial recognition.

When estimating ECLs on a collective basis for a group of similar assets (as set out in Note 21.2.6), the Bank applies the same principles for assessing whether there has been a significant increase in credit risk since initial recognition.

#### 21.2.6 Grouping financial assets measured on a collective basis

As explained in Note 2.5(g)(i) dependent on the factors below, the Bank calculates ECLs either on a collective or an individual basis.

Asset classes where the Bank calculates ECL on an individual basis include:

- All Stage 3 assets, regardless of the class of financial assets
- The commercial and corporate lending and overdraft portfolio
- The mortgage portfolio
- The retail lending portfolio
- The credit card portfolio

Asset classes where the Bank calculates ECL on a collective basis include:

- The retail overdraft portfolio
- Subsidiaries with small, homogeneous retail portfolios
- Past due not yet relegated credit facilities

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

### 21. Risk management (continued)

### 21.2 Credit risk (continued)

#### 21.2.7 Analysis of gross carrying amount and corresponding ECLs are as follows:

Advances	2025	2024
Stage 1	86.83%	89.27%
Stage 2	9.36%	7.21%
Stage 3	3.81%	3.52%
	100.00%	100.00%

In response to global economic uncertainty exacerbated by high inflation and rising interest rates, the Bank undertook a review of its loan portfolios, determining the high-risk sectors and the ECL for each. The review considered the macroeconomic outlook, customer credit quality, type and value of collateral held, exposure at default and the effect of payment deferral options as at the reporting date.

The ECL methodology and definition of default remained consistent with prior periods. Calculation inputs, including forward looking information, together with the determination of the staging of exposures were however revised.

ECL	(1)	(7)			(8)
	5,044	445		1	5,490
ECL as a % of gross investments	0.02	1.55	_	_	0.15

The increase in ECLs for Stage 2 investments is driven by an increase in the non-investment grade portfolio.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025 Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

#### 21. Risk management (continued)

### 21.3 Liquidity risk

Liquidity risk is defined as the risk that the Bank either does not have sufficient financial resources available to meet all its obligations and commitments as they fall due, or can access these only at excessive cost.

Liquidity management is therefore primarily designed to ensure that funding requirements can be met, including the replacement of existing funds as they mature or are withdrawn, or to satisfy the demands of customers for additional borrowings. Liquidity management focuses on ensuring that the Bank has sufficient funds to meet all of its obligations.

Three primary sources of funds are used to provide liquidity – retail deposits, wholesale deposits and the capital market. A substantial portion of the Bank is funded with 'core deposits'. The Bank maintains a core base of retail and wholesale funds, which can be drawn on to meet ongoing liquidity needs. The capital markets are accessed for medium to long-term funds as required, providing diverse funding sources to the Bank. Facilities are also established with correspondent banks, which can provide additional liquidity as conditions demand.

The Asset/Liability Committee (ALCO) sets targets for daily float, allowable liquid assets and funding diversification in line with system liquidity trends. While the primary asset used for short-term liquidity management is the Treasury Bill, the Bank also holds significant investments in other Government securities, which can be used for liquidity support. The Bank continually balances the need for short-term assets, which have lower yields, with the need for higher asset returns.

#### 21.3.1 Analysis of financial liabilities by remaining contractual maturities

The table below summarises the maturity profile of the Bank's financial liabilities at September 30, based on contractual undiscounted repayment obligations, over the remaining life of those liabilities. These balances include interest to be paid over the remaining life of the liabilities and will therefore be greater than the carrying amounts on the separate statement of financial position. Refer to Note 24 for a maturity analysis of assets and liabilities.

#### 21. Risk management (continued)

#### 21.4 Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates, foreign exchange rates and equity prices.

#### 21.4.1 Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments. The Bank has an ALCO which reviews on a monthly basis the non-credit and non-operational risk. Asset and liability management is a vital part of the risk management process of the Bank. The mandate of the Committee is to approve strategies for the management of the non-credit risks of the Bank, including interest rate, foreign exchange, liquidity and market risks.

The primary tools currently in use are gap analysis, interest rate sensitivity analysis and exposure limits for financial instruments. The limits are defined in terms of amount, term, issuer, depositor and country. The Bank is committed to refining and defining these tools to be in line with international best practice.

Interest on financial instruments classified as floating is repriced at intervals of less than one year while interest on financial instruments classified as fixed is fixed until the maturity of the instrument.

An interest rate sensitivity analysis was performed to determine the impact on net profit of a reasonably possible change in the interest rates prevailing as at September 30, with all other variables held constant. The impact on net profit is the effect of changes in interest rates on the floating interest rates of financial assets and liabilities. This impact is illustrated on the following table:

# NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

		Increase	Decrease	Increase	Decrease
TTD Instruments	+/- 50	89	(89)	77	(77)
USD Instruments	+/- 50	22	(22)	17	(17)

## 21.4.2 Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Bank's exposure to the effects of fluctuations in foreign currency exchange rates arises mainly from its investments and overseas subsidiaries and associates. The Bank's policy is to match the initial net foreign currency investment with funding in the same currency. The Bank also monitors its foreign currency position for both overnight and intra-day transactions.

Changes in foreign exchange rates affect the Bank's earnings and equity through differences on the re-translation of the net assets and related funding of overseas subsidiaries and associates, from the respective local currency to TTD. Gains or losses on foreign currency investment in subsidiary and associated undertakings are recognised in reserves. Gains or losses on related foreign currency funding are recognised in the separate statement of income.

The tables below indicate the currencies to which the Bank had significant exposure at September 30, on its non-trading monetary assets and liabilities and its forecast cash flows. The analysis also calculates the effect of a reasonably possible movement of each currency rate against the TTD, with all other variables held constant.

## 21. Risk management (continued)

## 21.5 Operational risk

The growing sophistication of the financial industry has made the Bank's operational risk profile more complex. Operational risk is inherent within all business activities and has the potential for financial or reputational loss arising from inadequate or failed internal controls, operational processes or the systems that support them. It includes errors, omissions, disasters and deliberate acts such as fraud.

The Bank recognises that such risk can never be entirely eliminated and manages the risk through a combination of systems and procedures to monitor and document transactions. The Bank's operational risk department oversees this and where appropriate, risk is transferred by the placement of adequate insurance coverage.

The Bank has developed contingency arrangements and established facilities to support operations in the event of disasters. Independent checks on operational risk issues are also undertaken by the internal audit function.

Managing cybersecurity related threats across the Bank remains a major priority. As part of the Bank's business strategy in reducing cyber risk exposure, cybersecurity is embedded in the design of technology and services prior to deployment. The Bank's Enterprise Risk Management Committee is responsible for overseeing cybersecurity risks and maintaining cybersecurity risk appetite. Mechanisms are in place across the Bank to predict, prevent, detect and respond against cyber threats and where appropriate, risk is transferred by the placement of adequate insurance coverage.

#### 22. Capital management

The Bank's policy is to diversify its sources of capital, to allocate capital within the Bank efficiently and to maintain a prudent relationship between capital resources and the risk of its underlying business. Equity increased by \$0.48 billion to \$6.54 billion during the year under review.

## NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

### **22.** Capital management (continued)

Capital adequacy is monitored by the Bank, employing techniques based on the guidelines developed by the Basel Committee on Banking Regulations and Supervisory Practice (the Basel Committee), as implemented by the Central Bank in May 2020 for supervisory purposes.

The Central Bank of Trinidad and Tobago's risk-based capital guidelines under the Basel II accord require a minimum ratio of common equity Tier I capital to risk-weighted assets of 4.5%, a minimum ratio of core capital ratio (Tier I) to risk-weighted assets of 6%, and a minimum total qualifying capital ratio (Tier I and Tier II) of 14% (including Capital Conservation Buffer (CCB) and Domestic Systemically Important Bank (D-SIB) Charge). Core (Tier I) capital comprises mainly of shareholders' equity.

 2025
 2024

 Capital adequacy ratio: Basel II
 16.01%
 15.70%

At September 30, 2025, the Bank exceeded the minimum level required for adequately capitalised financial institutions (2024: exceeded).

#### NOTES TO THE SEPARATE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

### 25. Equity compensation benefits

### a) Profit sharing scheme

It is estimated that approximately \$150 million (2024: \$138 million) will be allocated to staff from the profit sharing scheme in the current financial year as shown in Note 17(d). During the 2025 financial year \$137.32 million was advanced to the staff profit sharing scheme (2024: \$25.05 million).

## b) Stock option plan

These options are issued using the shares of RFHL. RBL refunds RFHL on an annual basis for the cost of options determined by a qualified actuary. In 2025 the cost of the options expensed in the separate statement of income was \$5.124 million (2024: \$4.735 million).

### 26. Dividends paid and proposed

Declared and paid during the year	2025	2024
Equity dividends on ordinary shares:		
Final dividend for 2024: \$3.08 (2023: \$3.56)	245	283
Total dividend for 2025: \$4.95 (2024: \$4.65)	394	370
Total dividends paid	639	653
Proposed		
Equity dividends on ordinary shares:		
Final dividend for 2025: \$3.37 (2024: \$3.08)	268	245

#### 27. Contingent liabilities

## a) Litigation

As at September 30, 2025, there were certain tax and legal proceedings outstanding against the Bank. No provision has been made as professional advice indicates that it is unlikely that any significant loss will arise or that it would be premature at this stage of the action to determine the eventuality.

### NOTES TO THE SEPARATE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

### 27. Contingent liabilities (continued)

## b) Customers' liability under acceptances, guarantees, indemnities and letters of credit

	2025	2024
Acceptances	1,782	1,845
Letters of credit	103	303
	1,885	2,148
c) Sectoral information		
State	45	44
Corporate and commercial	1,156	1,434
Personal	16	26
Other financial institutions	566	571
Other	102	73
	1,885	2,148

### d) Pledged assets

The table below illustrates the distribution of pledged assets in the Bank's separate statement of financial position:

	Carrying amount		Related liability	
	2025	2024	2025	2024
Other fund raising				
instruments	105	118	105	118

The financial assets pledged by the Bank relate to a pool of investment securities and treasury bills, held for the purpose of providing collateral for the counterparty. Individual securities within the pool may be sold by the Bank once the total value of the pool exceeds the value of the liability. In the event of the Bank's default, the counterparty is entitled to apply the collateral in order to settle the liability.

## NOTES TO THE SEPARATE FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2025

Expressed in millions of Trinidad and Tobago dollars, except where otherwise stated (Continued)

## 28. Subsidiary companies

	Country of	Equity
Name of company	incorporation	interest
Atlantic Financial Limited  International Bank	Saint Lucia	100.00%
Republic Caribbean Investments Limited Investment Company	Saint Lucia	100.00%
London Street Project Company Limited Facilitate Financing of Property Development Projects	Trinidad and Tobago	100.00%
Republic Investments Limited Investment Management Company	Trinidad and Tobago	100.00%
Republic Trustee Services Limited Investment Advisory Company	Trinidad and Tobago	100.00%

#### 29. Structured entities

The Bank sponsors several structured entities which are not consolidated as the Bank is not deemed to be in control of those entities. The Bank considers itself to be sponsor of a structured entity when it facilitates the establishment of the structured entity. The Bank may hold an interest in some of these entities but does not provide any financial support to these entities.

These structured entities include Mutual Funds and Retirement Benefit Plans which are financed through the issue of units to investors in the funds. The Bank generates fees from managing the assets of these funds on behalf of the third party investors. For the year ended September 30, 2025, the Bank earned \$2.1 million (2024: \$2.2 million) in management fees from the retirement plans and \$64.2 million (2024: \$101 million) from the mutual funds.

The Bank holds an interest of \$16 million in sponsored funds as at September 30, 2025 (2024: \$16 million). The maximum exposure to loss in these funds is the carrying value of the assets held by the Bank. These values are all included in the investment securities portfolio of the Bank as at September 30, 2025.

### 30. Events after the reporting date

There are no events after the reporting date that require adjustment to or disclosure in these separate financial statements.
